

# ELECTRIS

## Advanced coating process on copper & aluminium elements

Electris possesses the capability to produce high-dielectric **epoxy powder-coated insulation for copper or aluminium parts.**

We can cover components of **many sizes, shapes, and types, providing robust and snug insulation solutions.**

# EPOXY COATING ON COPPER & ALUMINIUM PARTS

The highest precision and supreme quality of Electris coatings.

## Powder coating of bare or electroplating parts

The process of powder coating can be **combined with electroplating using silver, nickel, tin and other metals.**

## Wide range of applications

Our painted services are suitable for a wide range of components used in industries, such as: **e-mobility, electrical switchgear, renewable energy, data centres.**

## Diverse range of coating thickness and colours

## Effective electrical insulation

Epoxy - painted components provide excellent electrical insulation.

## High mechanical resistance

Our coating are extremely hard and resistant do damage.

Our coatings can be applied to different components (bus bars, connectors, and others).

We can offer a **wide range of coating thicknesses and various powder colours (particularly black, orange, grey, and blue).**

Read more about our capacity on **www.electrispower.com**

**Electris also offers masking systems, designed individually to meet the project's requirements.**

## **Ecologically friendly coatings**

We offer epoxy powder coatings which are **safe and easy to dispose of, posing no harm to the environment.**

Our company has joined **the EcoVadis certification** and has been recognized for its efforts in the field of sustainable development.

## **Supreme quality and efficient application**

Every product that leaves our plant is thoroughly tested and inspected in a quality control processes that covers several stages.

Our coating undergoes comprehensive tests, including:

- **isolation parameters,**
- **mechanical strength,**
- **adhesion,**
- **and corrosion resistance.**

We develop comprehensive **PPAP documentation.**

## Cooperation with Electris

### Experience

20 years of experience  
in non-ferrous metal  
processing.

---

### Excellent quality guarantee

The top quality, accuracy  
and precision of  
workmanship are what our  
customers value us for.

### Knowledge

Know-how of highly qualified  
engineers and technologists  
of the R&D department.

---

### Customer oriented approach

Comprehensive customer  
service and support at every  
stage of the order process.
